Nice little gem here, definitely pick it up if you're into this kind of thing. Aerofly RC7 is a flight simulator of RC aircraft and can also be used as a training tool for those interested in the real hobby. Aircraft range from miniature indoor helicopters to full scale, fuel-guzzling beasts, every one is easy to fly yet tough to master! The sim includes beautiful photo-realistic scenery from real locations all over the world with many different airparks to fly from, which all have their differences, my favourite being the variation in runways (gradient, length, width etc). Every one makes for a challenging flight without even considering the wind yet!

The hud is great and easy to interpret, it includes vital instruments in a simple easy to read format which can all be adjusted to your liking from the dropdown menus, everything works very smoothly and everything feels like how it should feel. From the menus you can also customize each aircraft to your liking e.g. throws and whatnot. I've found nothing annoying about this sim yet but If I do I'll be sure to come back and update this review.

To sum it up;

Pros:

Great physics

Awesome interface

Stunning photorealistic scenery

Smooth running, high fps on ultra settings

Easy super simple control setup(Regular Joystick, Keyboard or RC transmitter of the simulator type)

Plenty of great aircraft

TrackIR compatible

Very customizable (Aircraft flight surfaces, throws etc..)

Cons:

None other than the cost aspect, I got the regular edition yet moved to ultimate as I noticed a few of my favourite birds were in it. Ended up costing me well over \$100 all up.

I guess in the end if you really are into flight in general, flight simming or RC aircraft the enjoyment had is definitely worth it. Like all flight sims especially those with payware they are not cheap, I'd honestly say this one is worth every penny, and I personally love it!

A must have for any AVGeek!. Awful mechanics, UI, just don't buy. How peculiar, and strangely casual and carefree. The subjects are serious in nature, but the execution felt loose, flexible, I don't know, it's very interesting. It touches up on life, death, sadness, and happiness, btw, or at least that's what I picked up on. General concepts that we're all familiar with, but really never think too much about because they're left to just being experienced and felt. This game is also really direct, pretty much throwing subtlety out the window. Didn't feel overwhelming, I must admit. I actually took it as is, not exactly welcomed it, but accepted it. Maybe that's why a more relaxed approach was used, because all will not respond to the same thing. Not bad, not bad at all.. "Mixed" reviews?

What is this?

HERESY?!?!?. First off, I'd like to state that I'm Canadian, and have no personal experience with living under the Trump regime.

Game's a tad glitchy; I have not currently obtained the full version of the game (nor do I plan to), yet received Achievements for

wall-building and Tweet-typing upon first booting it up. As for playing the game itself, it's not very fun; a single attack and recovery item in the free version, and Trump hurts himself if you randomly miss. Maybe try it out if you like political memes, but I don't find it engaging enough to recommend the teaser, let alone the full version of this.. Excellent number puzzle game. simple arithmetic equations, that can be solved numerous ways.

challenge is that selection of cells is governed by rules that up the challenge.

You like puzzling it out against a few numbers ?

Then buy this game.. If you're on mac, its definitely not something to look into. Updates are rare and mac users are unable to play past a glitch following the first puzzle at the start of the game (an issue that was acknowledged, but never resolved). The quick discussion reply was appreciated wholeheartedly, but it was never acted on, and i'm unable to get a refund because of it. The actual game looks great, i'm sure it has an amazing plot and adventure to it, just sad I probably wont be playing it for a long, long while.. i dont know what should i say but its so funny for me :)

The model is pretty good, but that's where it stops. Braking with this engine is a pain, as it takes forever to stop, and makes it hard to get on time to the different stations. Acceleration is also pretty bad, making things harder.

The first scenario is next to impossible to achieve, unless you spend 5 or 6 hours trying and finding all types of tricks to gain 1 more second between the second and the third stop in that scenario (and that's why I'm leaving a bad review, really. The first scenario was so frustrating to complete that it left a bad impression of the overall add-on on me).

Apart from the first scenario, the two other scenarios included work fine. All the achievements can be obtained (even the "Scotrail Saviour" one, but it'll require you lots of determination).. A great old school SHUMPS with a fantastic OST!. Overall Score: 4.5/5

5/7. Great sense of challenge!!!

Nice cartoon graphics.

Good one for those who like rage games.

ps: s+space saves lifes!!!. Go buy Homeworld. This game is a pale reflection to the glory of Homeworld. I was fine with the story of Nomad Fleet taking cus from Homeworld, but the gameplay, icons, gui, voices, artwork, and even ship design, are all

"inspired" by homeworld. This feels like it was released in the 90s.... Very enjoyable game! I highly recommend it for a nice and deep strategic experience. Broken... I can't even finish the 3rd level as the item i need isnt unlocked. I bought this game since I had the urge to play it again after I lost the disc years ago, AND IT IS JUST AS FUN AS I REMEMBER! The only problem on no fault of steam is, no tools for modding just raw files.
